Figure 1: A plot showing the distribution of points (numbered 0 to 26) and a shaded region. The plot is overlaid on a grid with axes labeled 'v' (vertical) and 'h' (horizontal). The shaded region is a complex shape, possibly representing a boundary or a specific area of interest. Points are numbered 0 to 26, with some points (0, 1, 2, 3, 4, 5, 6) forming a boundary on the left and top. Points 7 through 26 are distributed within the shaded region, with some points (13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26) forming a boundary on the right and bottom. The plot is titled 'YTOS-4'.

Figure 2: A table showing the results of a simulation or analysis. The table has 5 columns: 'name', 'p1', 'p2', 'units', and 'scale'. The rows are labeled with 'name' and 'p1' values, and the 'units' and 'scale' columns show the results. The table is titled '0076'.

Figure 3: A plot showing the distribution of points (numbered 0 to 26) and a shaded region. The plot is overlaid on a grid with axes labeled 'v' (vertical) and 'h' (horizontal). The shaded region is a complex shape, possibly representing a boundary or a specific area of interest. Points are numbered 0 to 26, with some points (0, 1, 2, 3, 4, 5, 6) forming a boundary on the left and top. Points 7 through 26 are distributed within the shaded region, with some points (13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26) forming a boundary on the right and bottom. The plot is titled '979'.

Figure 4: A plot showing the distribution of points (numbered 0 to 26) and a shaded region. The plot is overlaid on a grid with axes labeled 'v' (vertical) and 'h' (horizontal). The shaded region is a complex shape, possibly representing a boundary or a specific area of interest. Points are numbered 0 to 26, with some points (0, 1, 2, 3, 4, 5, 6) forming a boundary on the left and top. Points 7 through 26 are distributed within the shaded region, with some points (13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26) forming a boundary on the right and bottom. The plot is titled '121'.

Figure 5: A plot showing the distribution of points (numbered 0 to 26) and a shaded region. The plot is overlaid on a grid with axes labeled 'v' (vertical) and 'h' (horizontal). The shaded region is a complex shape, possibly representing a boundary or a specific area of interest. Points are numbered 0 to 26, with some points (0, 1, 2, 3, 4, 5, 6) forming a boundary on the left and top. Points 7 through 26 are distributed within the shaded region, with some points (13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26) forming a boundary on the right and bottom. The plot is titled 'WLR PCAU'.
