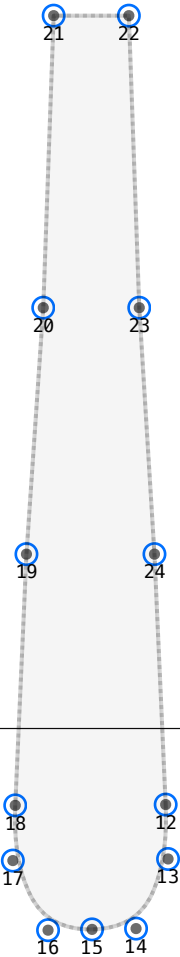

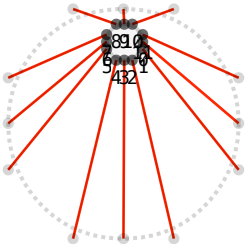

Diagram illustrating a network topology or system architecture, showing a central node (9) connected to multiple peripheral nodes (1-8, 10-11, 12-18, 20-24, 26-28) via various links (red, green, blue).

The diagram is divided into three main sections:

- Top Section:** Contains a circular network structure with nodes 1 through 11. Node 9 is the central hub, connected to nodes 1-8, 10, and 11. Nodes 1-8 are connected to nodes 10 and 11. Nodes 10 and 11 are connected to each other. A green line connects nodes 9 and 10. A red line connects nodes 9 and 11. A blue line connects nodes 9 and 12.
- Middle Section:** Contains a vertical network structure with nodes 12 through 24. Node 12 is the central hub, connected to nodes 13-18, 20, 21, 22, 23, and 24. Nodes 13-18 are connected to nodes 20 and 21. Nodes 20 and 21 are connected to each other. A green line connects nodes 12 and 20. A red line connects nodes 12 and 21. A blue line connects nodes 12 and 22.
- Bottom Section:** Contains a circular network structure with nodes 25 through 28. Node 25 is the central hub, connected to nodes 26-28. Nodes 26 and 27 are connected to each other. A green line connects nodes 25 and 26. A red line connects nodes 25 and 27. A blue line connects nodes 25 and 28.

Legend:

- Red line: XETS
- Green line: YDOT
- Blue line: XDOT
