The figure displays a complex, irregular shape, possibly a cross-section of a celestial body, with a grid overlay. The shape is defined by a series of points numbered 0 through 38. The points are connected by lines, with some lines colored green, red, or blue. The shape is filled with a light gray color. The plot is overlaid on a grid with axes labeled 'micro' and 'X0ET4'. A table on the right lists parameters for different regions.

The figure displays a complex, shaded region (likely a cross-section of a celestial body) with a grid of points numbered 0 to 38. The points are distributed around the perimeter and within the region. Several red lines connect specific points, indicating a path or a set of measurements. The plot is overlaid on a grid with axes labeled 'micro' and 'Y0ET112'. A table on the right lists parameters for various points, including 'name', 'p1', 'p2', 'units', and 'scale'.
