

Diagram illustrating a structural analysis of a vertical member, likely a column or wall, showing internal forces and moments. The diagram is divided into three main sections: a top section, a middle section, and a bottom section, separated by horizontal lines.

Top Section:

- Left side: A vertical line segment with a blue circle at the top (labeled 6) and a blue circle at the bottom (labeled 5). A dashed line connects these two points.
- Right side: A vertical line segment with a black dot at the top (labeled 7) and a black dot at the bottom (labeled 9). A dashed line connects these two points.
- Internal forces: A horizontal green line segment is shown between the two vertical lines, labeled 8.

Middle Section:

- Left side: A vertical line segment with a blue circle at the top (labeled 4) and a blue circle at the bottom (labeled 3). A dashed line connects these two points.
- Right side: A vertical line segment with a black dot at the top (labeled 10) and a black dot at the bottom (labeled 11). A dashed line connects these two points.
- Internal forces: A horizontal green line segment is shown between the two vertical lines, labeled 10.

Bottom Section:

- Left side: A vertical line segment with a blue circle at the top (labeled 1) and a blue circle at the bottom (labeled 0). A dashed line connects these two points.
- Right side: A vertical line segment with a black dot at the top (labeled 12) and a black dot at the bottom (labeled 13). A dashed line connects these two points.
- Internal forces: A horizontal green line segment is shown between the two vertical lines, labeled 11.

Legend:

name	p1	p2	units	scale
XOET	3	10	500	3.21
YSHE	0	1	119	1.00
YSHE	5	6	119	1.00
XETS	12	99	114	1.00
XETS	-1	1	64	1.00

Dimensions:

- Top section height: 64.00
- Middle section height: 980
- Bottom section height: 114.00

Labels:

- Top section: bracketright, 005D
- Middle section: 005D
- Bottom section: 005D, WLRPCA
