opsz8_wght1000_wdth50	Σ 31.91	P 31.16	A 0.00	C 0.00	W 44.00							
 A plot of a digit '9' shape defined by 16 points (0-15) connected by lines. The shape is filled with a light cyan color. The points are numbered 0 to 15, starting from the bottom left and moving clockwise around the shape.		 A plot of a digit '9' shape defined by 16 points (0-15) connected by lines. The shape is filled with a light magenta color. The points are numbered 0 to 15, starting from the bottom left and moving clockwise around the shape.		 A plot showing the difference between the parametric and reference shapes. It features two overlapping outlines: a cyan one and a magenta one. The difference is highlighted by small colored segments at the points where the two shapes diverge.		 A plot showing the tuning of the digit '9' shape. It features a gray outline of the digit with small red and black segments at the points where the shape is being adjusted.
