Figure 1: A 2D plot showing the geometry of the YSVU0 region, defined by the vertices 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17. The plot is divided into three main sections: a central shaded region (YSVU0), a top-left shaded region (XOUC), and a bottom-right shaded region (XUCS). The axes are labeled Z (vertical) and YSVU0 (horizontal). The plot includes a table of coordinates and a legend for the regions.

The plot shows the YSVU0 region (shaded gray) and the XUCS region (shaded gray). The XUCS region is defined by vertices 10, 99, 59, and 10. The YSVU0 region is defined by vertices 7, 5, 0, 8, 11, 14, 16, 17, 15, 6, 3, 4, 2, 1, 0, 13, 12, 14, 15, 16, 17. The plot also shows the XUCS region (shaded gray) and the YSVU0 region (shaded gray). The XUCS region is defined by vertices 10, 99, 59, and 10. The YSVU0 region is defined by vertices 7, 5, 0, 8, 11, 14, 16, 17, 15, 6, 3, 4, 2, 1, 0, 13, 12, 14, 15, 16, 17.

3D plot showing a complex geometric structure, likely a surface or volume, defined by points and lines. The plot is set in a coordinate system with axes labeled Z, Y, and X.

The Y-axis is labeled "YTUC541" and the X-axis is labeled "005A". The Z-axis is labeled "Z".

The plot displays several points (labeled 0 through 17) and lines connecting them. Some lines are highlighted in red and green, indicating specific paths or boundaries. A large shaded region is visible, representing a volume or surface.

The points are labeled with numbers: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17.

The lines are labeled with names: XUCS, YUCS, XTUC, YXUC, XSVU, YSVU, XOU, YOU, XTU, YXU.

The shaded region is labeled with "1013" and "2".
