Figure 1: A 2D plot showing the geometry of the XSVU0 instrument. The plot is a square with axes labeled Z (vertical) and X (horizontal). The X-axis ranges from -116 to -79, and the Z-axis ranges from 0 to 1014. The plot displays the instrument's footprint, which is a large, irregular polygon shaded in light gray. The footprint is defined by vertices labeled 0 through 17. The vertices are connected by solid lines, and the interior of the polygon is shaded. The vertices are labeled as follows: 0 (bottom left), 1 (top left), 2 (top left), 3 (top right), 4 (top right), 5 (top right), 6 (top right), 7 (top right), 8 (top right), 9 (top right), 10 (top right), 11 (top right), 12 (top right), 13 (top right), 14 (top right), 15 (top right), 16 (top right), 17 (bottom right). The plot also shows several smaller, shaded regions within the main footprint, representing different instrument components or sub-footprints. These regions are labeled with numbers 1 through 17. The plot is titled "XSVU0" and includes a table of instrument parameters in the top right corner.

WLRPCAU

Diagram illustrating a network structure, likely a road network, overlaid on a grid. The diagram shows a central shaded gray area representing a main road corridor, with several smaller shaded areas representing side roads or branches. Nodes are marked with blue circles and numbered 0 through 17. Green lines connect nodes 7 and 8, and nodes 5 and 6. Red lines connect nodes 15 and 16, and nodes 14 and 15. Dashed gray lines indicate the main road corridor and other connections.

WLRPCA U

3D plot showing a complex geometric structure, likely a model of a protein or molecular assembly, rendered in a light gray shaded volume. The plot is set in a coordinate system with axes labeled Z, Y, and X. The Y-axis is labeled 'YTUC541' and the X-axis is labeled '005A'. The Z-axis is labeled 'Z'. The plot shows a large, irregularly shaped region shaded in light gray. This region is composed of several smaller, interconnected volumes. Points are labeled with numbers from 0 to 17. Points 0, 1, 13, 14, 15, 16, and 17 are marked with blue circles. Points 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12 are marked with black dots. Lines connect these points, forming the edges of the volumes. Some lines are solid, while others are dashed. The lines are colored in blue, red, and green. The plot is titled 'WLR PCAU' in the bottom right corner.
