Figure 1: A plot showing the distribution of 32 points (numbered 0 to 31) in a 2D space. The points are arranged in a V-shape, with points 0-15 forming the upper part and points 16-31 forming the lower part. The points are connected by lines, forming a network. The plot is titled "YTDE-310" and includes a color bar on the right labeled "WLR PCAU" with values ranging from -16 to -30. The color bar shows a gradient from blue (-16) to red (-30). The plot also includes a table of data for the points, with columns for "name", "p1", "p2", "units", and "scale".

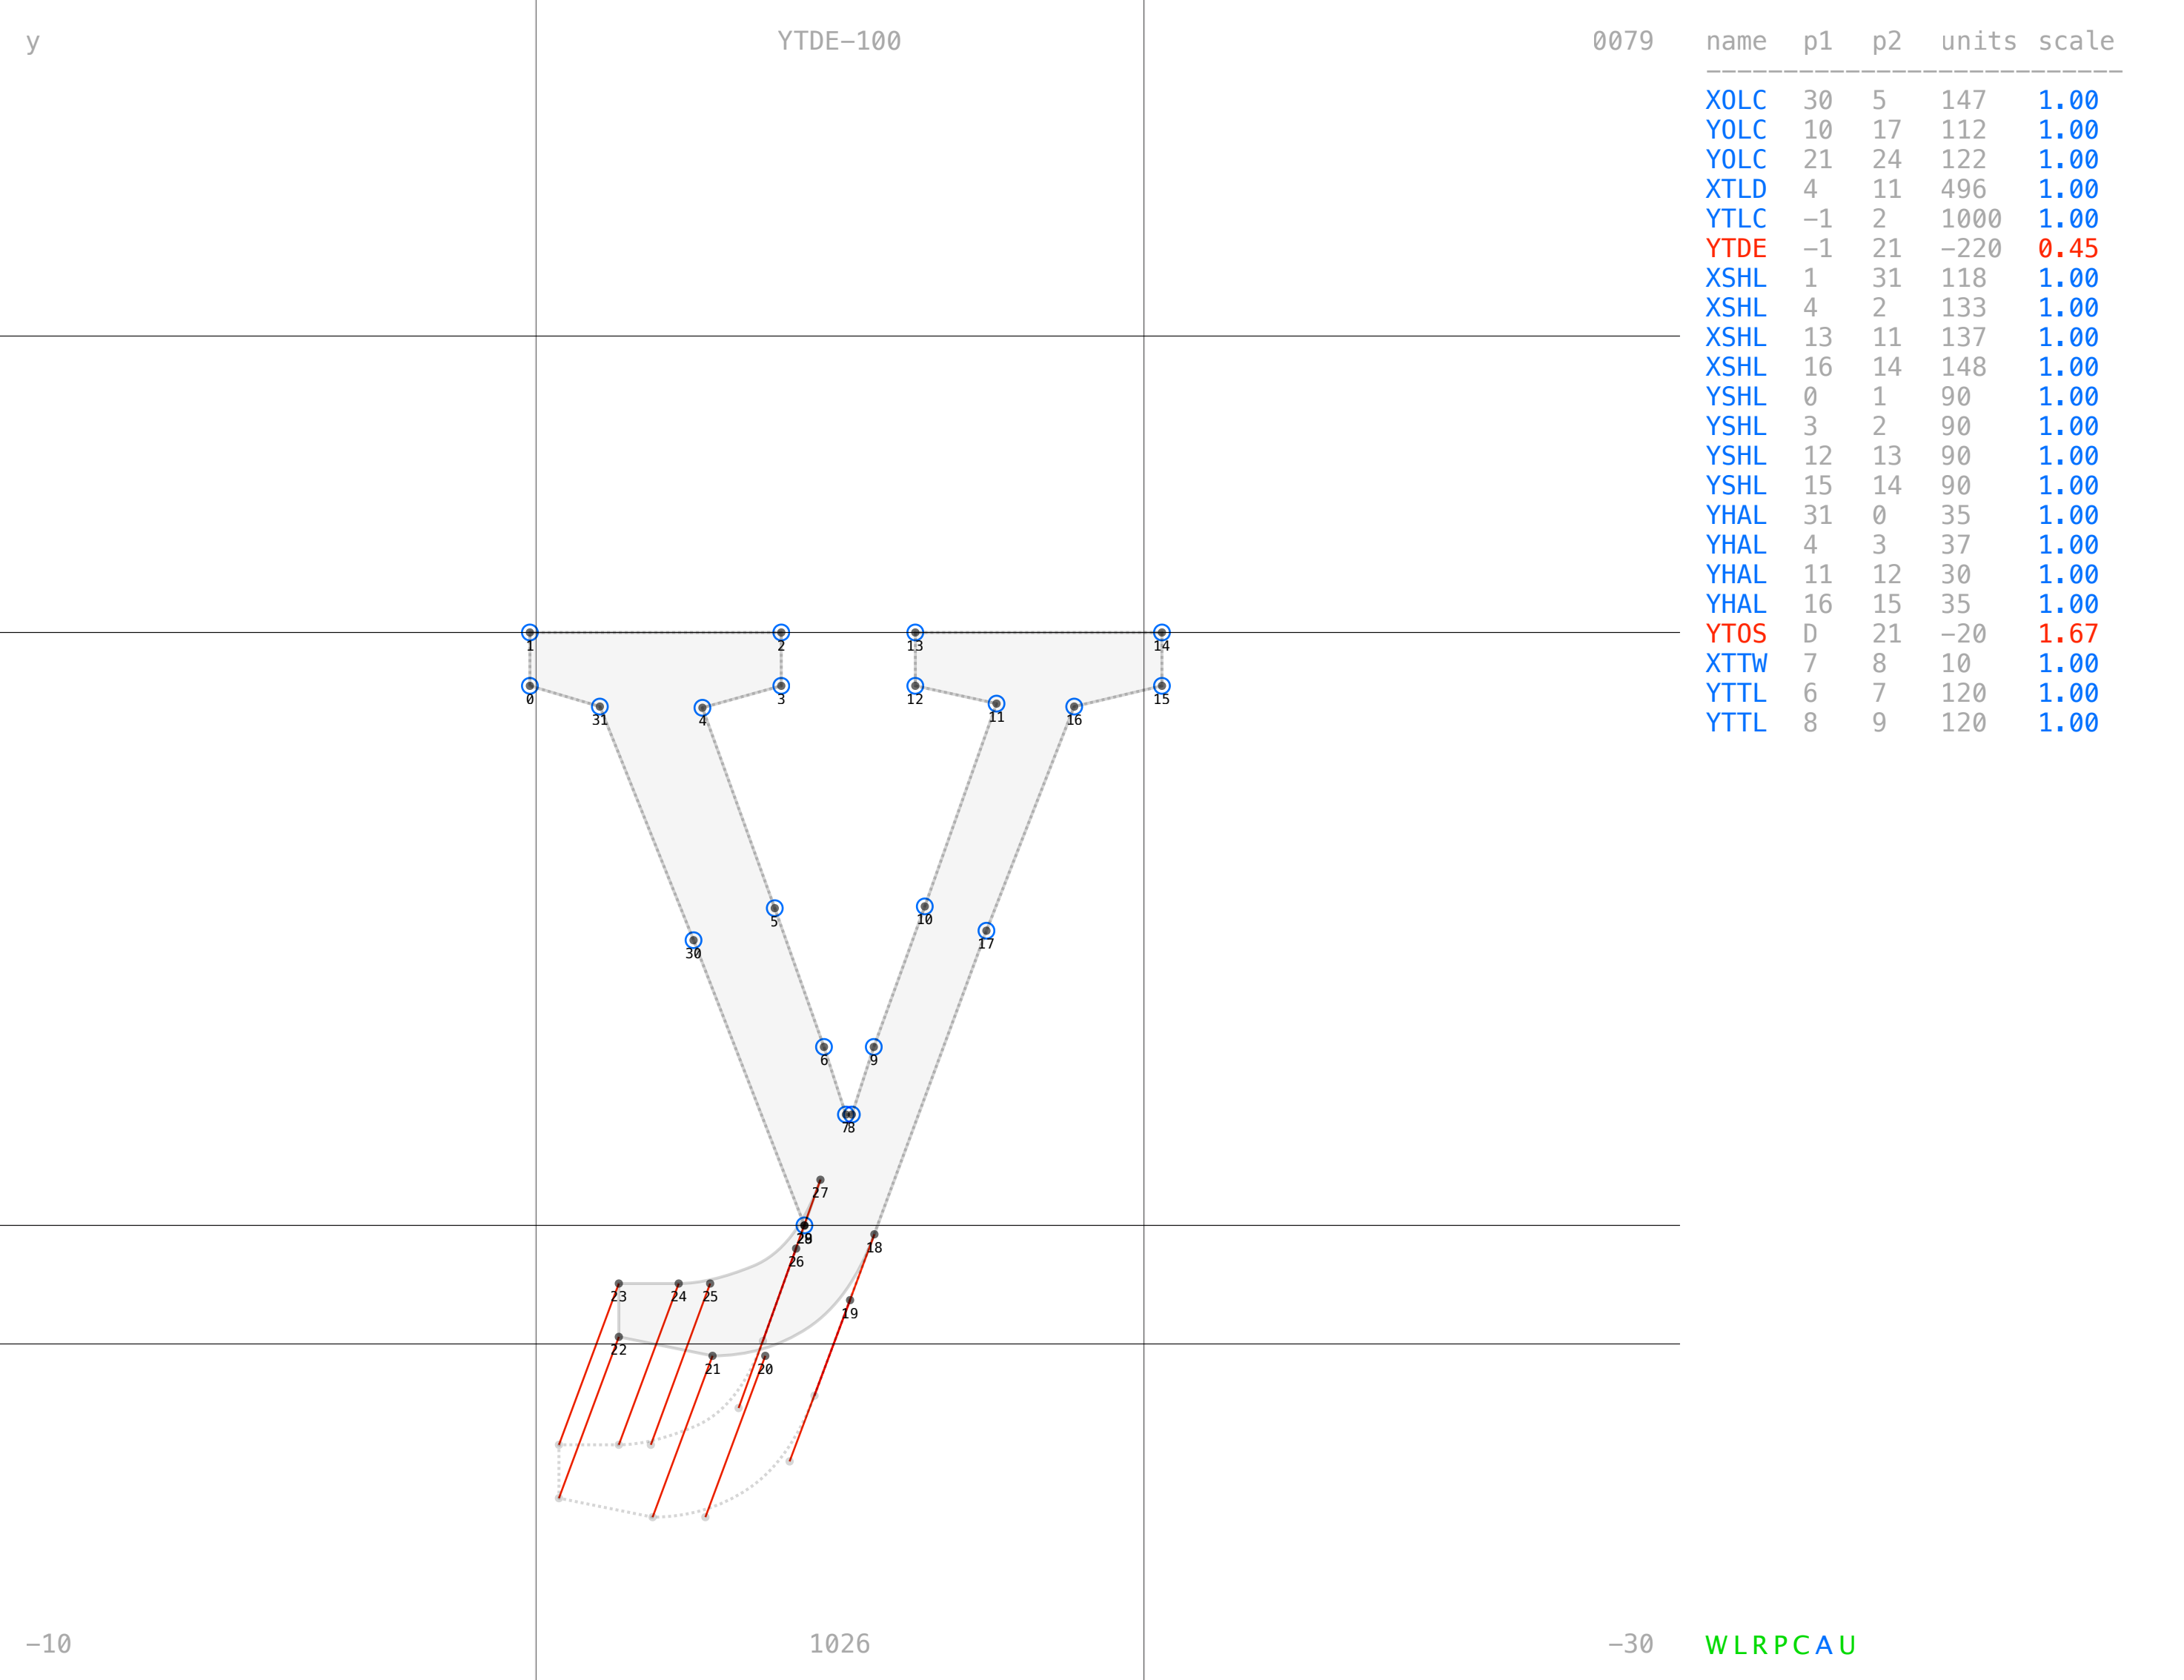

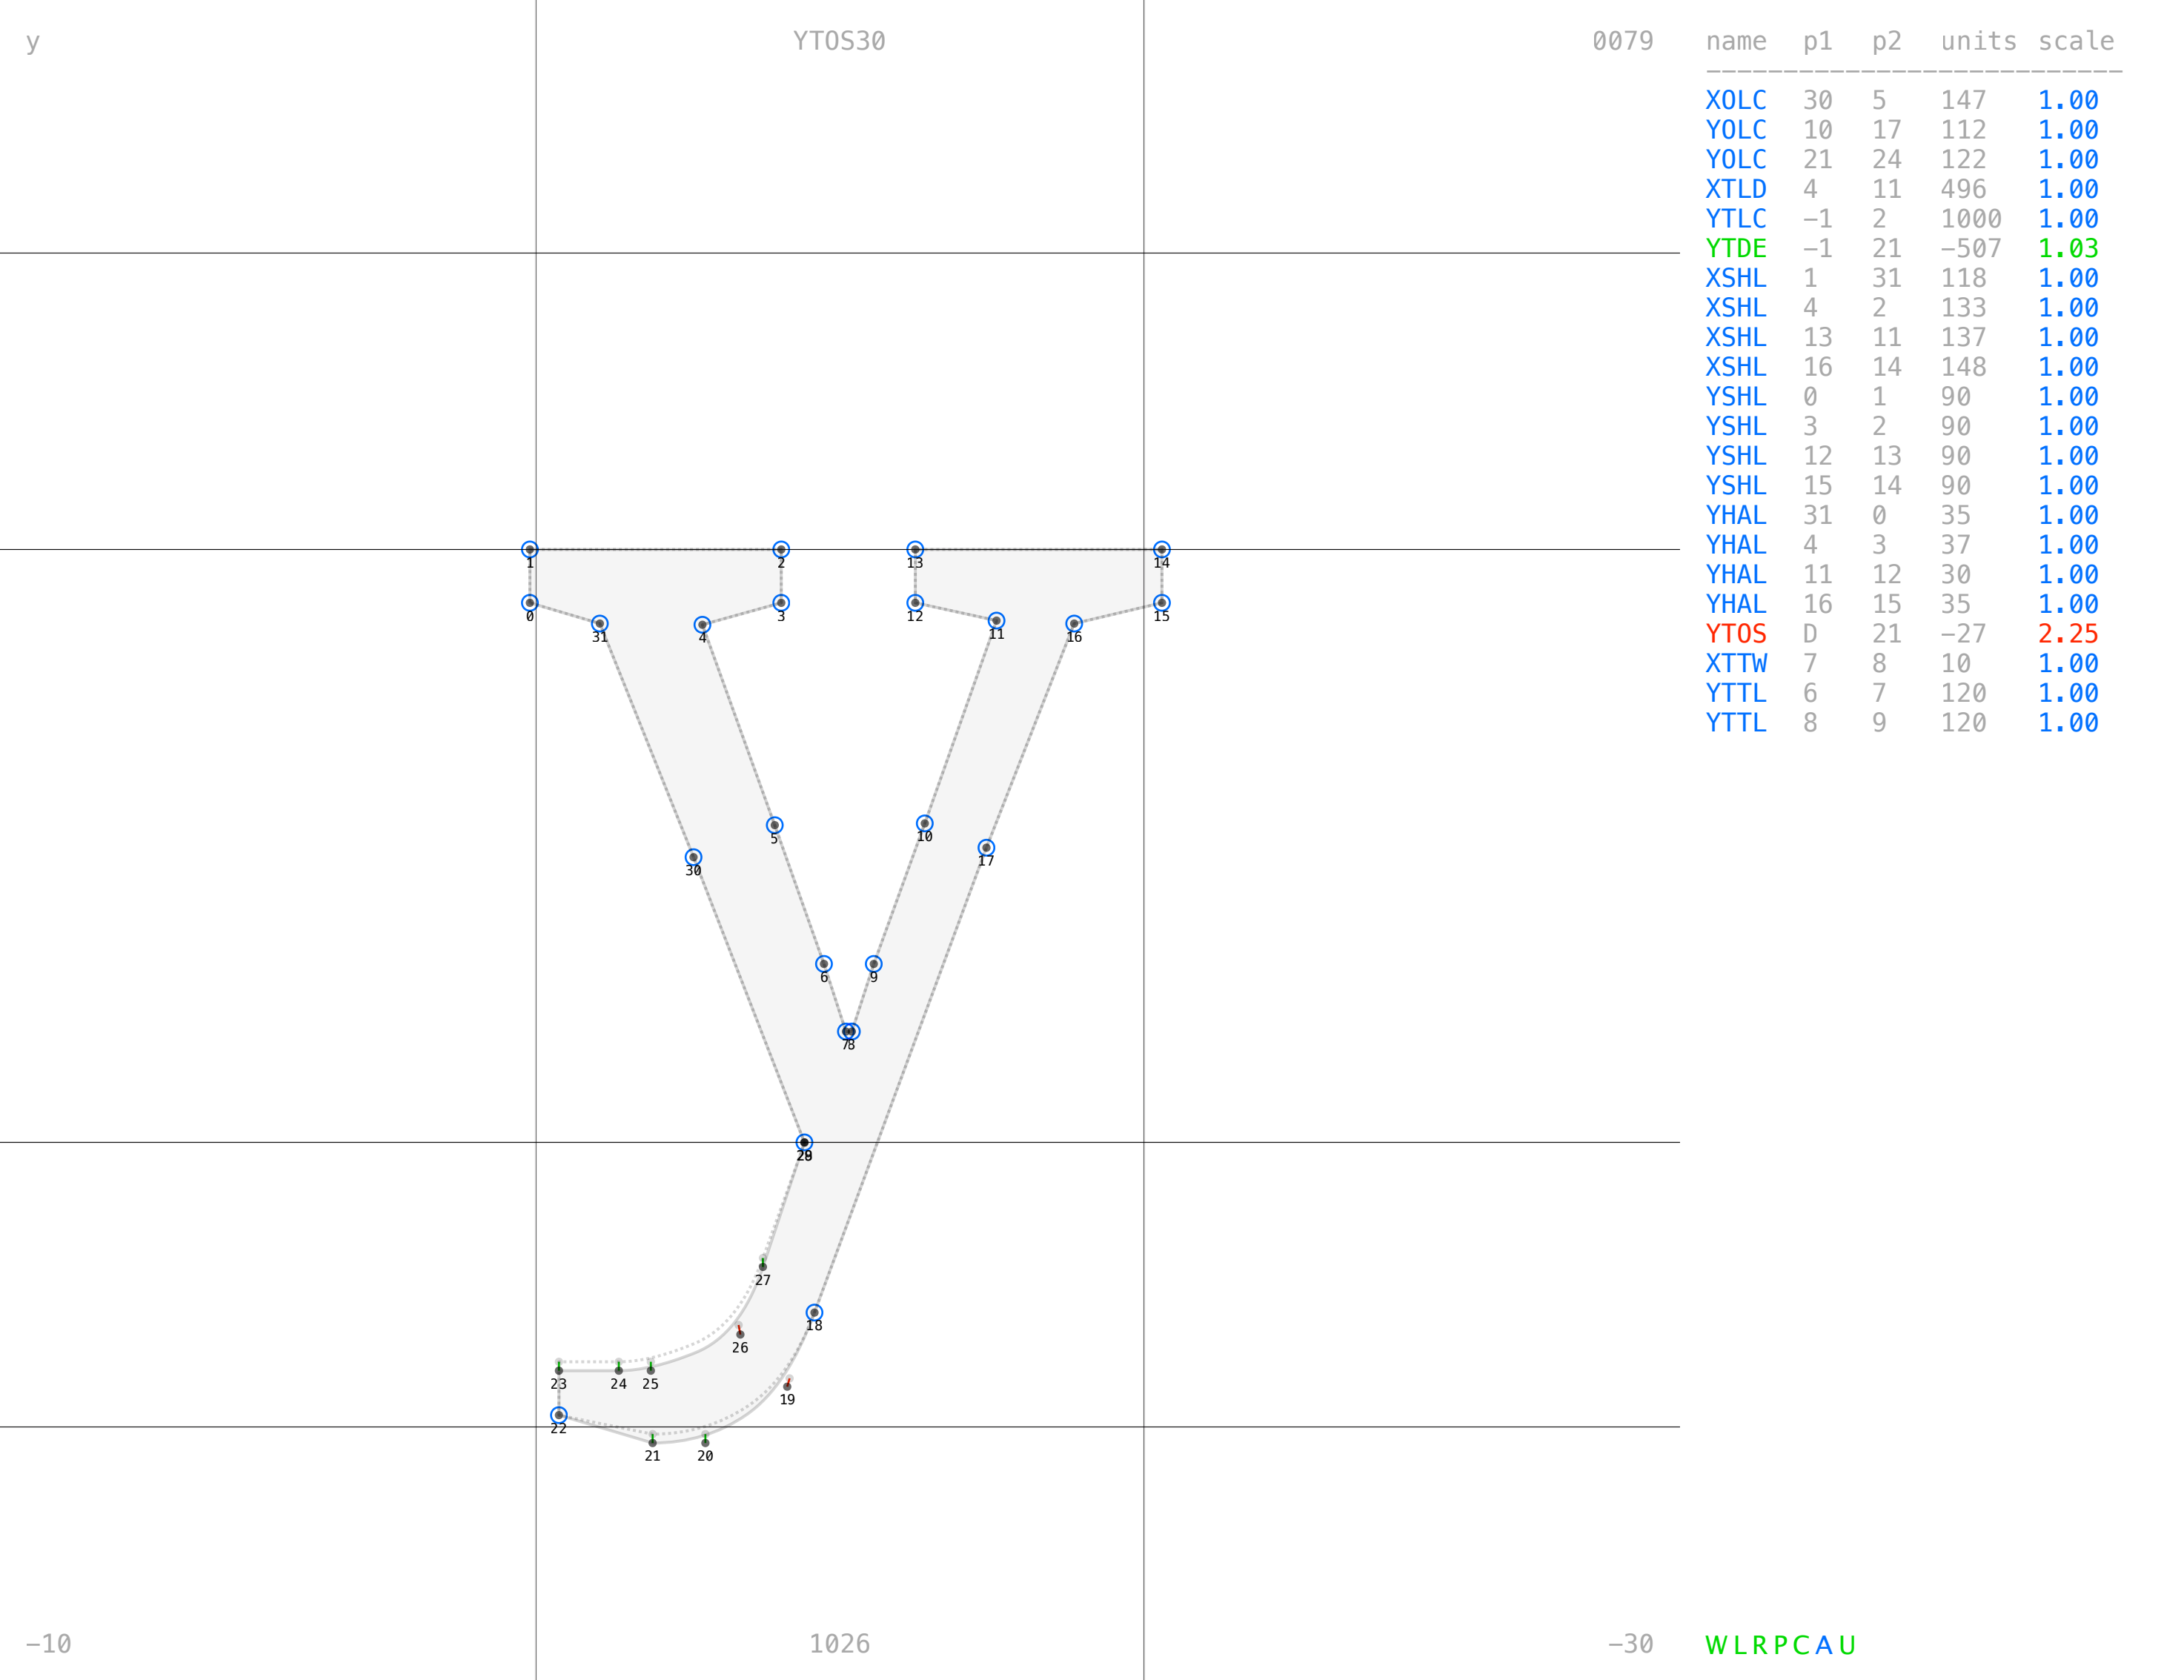

Figure 1: A plot showing the distribution of the number of stars in the YTLCAU (YTLCAU) region. The plot displays a large, irregularly shaped region (shaded gray) representing the distribution of stars. The region is bounded by a solid line and a dashed line. The dashed line represents the distribution of stars in the YTLCAU region, while the solid line represents the distribution of stars in the YTLCAU region. The plot includes a table of data points (name, p1, p2, units, scale) and a legend for the color scale (WLRPCA).
